

Two-predictor amyloidogenicity map

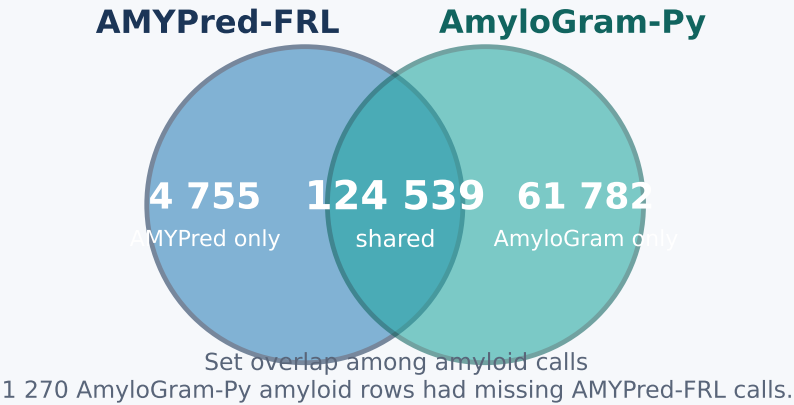

AMYPred-FRL and AmyloGram-Py predictions across validation protein rows

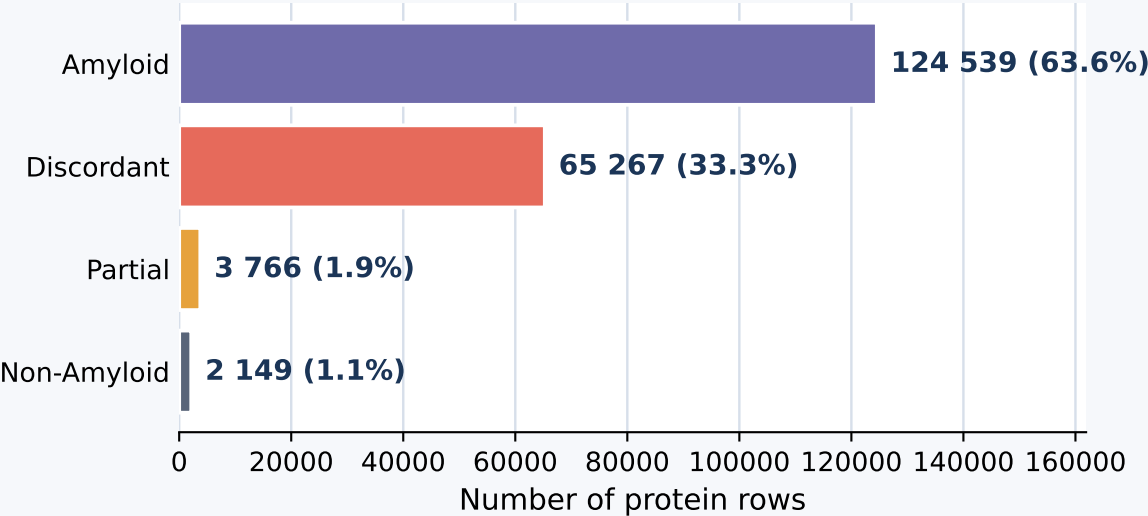

Amyloid predictions by tool

Overlap of amyloid predictions

Consensus classes

Collapsed protein-coding transcript check

Total collapsed transcripts	113 954
AMYPred-FRL amyloid	77 156
AmyloGram-Py amyloid	110 720
Shared amyloid calls	75 464

Interpretation: AmyloGram-Py gives broader amyloid coverage, while the shared set defines the strict two-predictor amyloid-positive core.
